

33" Powerblast fan- Stainless steel axial flow fan blades with aggressive flare at the blade tip where air is pumped. Selection of 6 blade pitches- match your tractor horsepower and application.

All 304 stainless steel blower housing- strongest in the industry: engineered for maximum air delivery and structural integrity. **Wide tip axial flow fan blades, large radius air inlet and outlet transitions, and a tight tolerance fit between fan and fan housing** combine to make the Rears Cherry Blower the most efficient and powerful performer on the market.

Stainless steel side scoops- fan housing and scoops are tilted forward 15° to *squeegee* water ahead- not blow water back on to fruit.

Proven Powerblast gearbox- rugged dependability, season after season. Input bearing block protects gearbox. 35 series driveline included.

Heavy Duty tubular framing

Cat I/II 3-point mount

Direct drive power to fan- no electric clutch.
